

client

Active Vet Care, Slough

facilities required

Air cleaning, cooling & heating of the veterinary centre

our role

Design and installation of air conditioning and electrical systems within a “live” building to enhance customer and staff comfort levels.

engineering solution

-  Design of system to provide air cleaning as well as both heating and cooling
-  Toshiba RAS system selected to keep noise levels to a minimum and therefore reduce noise disturbance to customers and staff
-  Inverter controlled system ensures minimum energy consumption
-  System installed utilised single phase electrical supply
-  Split systems used so additional units can be added to other areas of the building in the future should they be required

outcome

Completed on time and within budget. Works conducted within “live” veterinary surgery. Enhanced air purification. Increased staff and customer comfort. Current service & maintenance contract.
